Mushrooms

Why
consume
them?

Mushrooms, classified in the Fungi kingdom, stand out for their high nutritional value and medicinal properties, with more than 200 beneficial health functions. Their regular consumption helps eliminate toxins and strengthen the immune system.

Key Benefits:

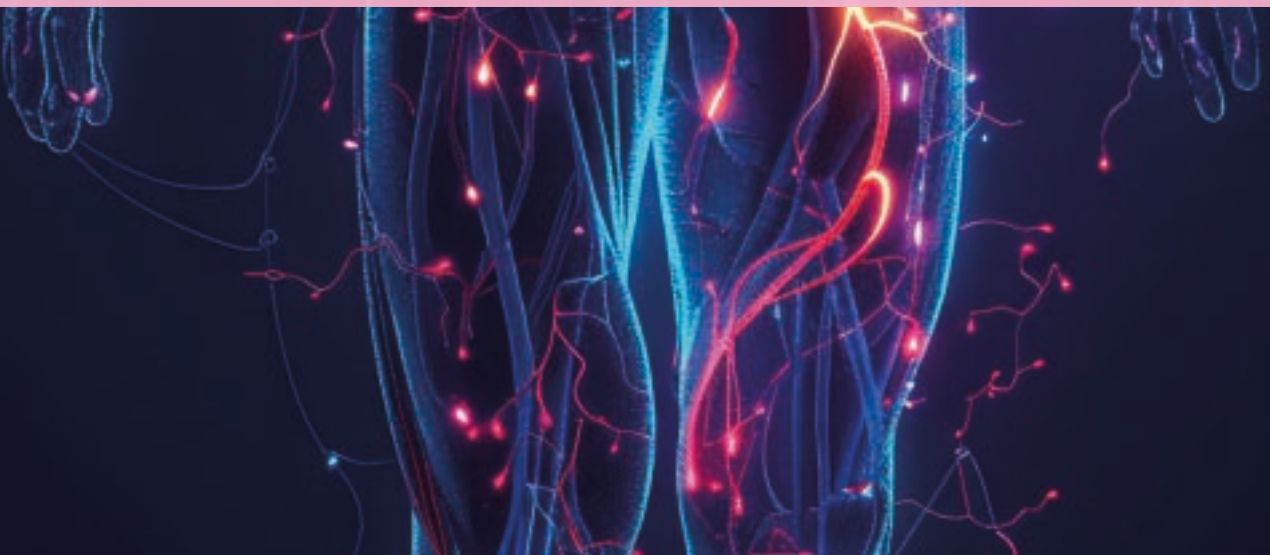

1. Digestive Health: They improve intestinal transit and detoxify the liver.
2. Cardiovascular Health: Blood pressure, cholesterol and glucose regulators.
3. Mental Wellness: Reduces fatigue and stress, improving sleep and brain development.
4. Immune System: Antibacterial and antiviral effects, strengthen the body's defenses.
5. Bone Health: Prevents bone and joint degeneration.
6. Anti-inflammatory properties: Reduce muscle pain and post-workout symptoms.
7. Antitumor effects: Properties that fight cancer and prevent metastasis.

Stages of action in the organism:

- Exploration (1-30 days): Initial subtle effects.
- Detoxification (1-30 weeks): Elimination of toxins.
- Regulation (1-12 months): Balancing of body functions.
- Building (6-24 months): Strengthening and recovery of the immune system and organs.
- Regeneration (1-3 years): Medicinal mushrooms optimize body functions, rejuvenate skin and tissues, and maintain overall body balance.

*How to obtain the purest **extract***

Gano Excel, a Malaysian company, has been studying mushroom tissue since 1983 and took 12 years to identify the six species with the highest nutritional value.

Gano Excel has fused six mushrooms with high nutritional value, highlighting Ganoderma lucidum as the most nutritious mushroom in the world. The company has the largest organic plantations and uses efficient processes in cultivation and extraction, achieving a soluble extract containing 150 antioxidants and 200 phytonutrients.

Ganoderma lucidum

This mushroom, which matures in 3 months, develops 150 antioxidants, 200 phytonutrients and beta-glucans. Its benefits include longevity, skin protection against free radicals, immune system regulation, stimulation of metabolism for weight control, improved kidney function, prevention of flu and colds, and increased energy.

Excellium

With 1 month of maturation, this mushroom is rich in mycelium, organic germanium and polysaccharides.

Its main action focuses on the central nervous system and blood oxygenation, promoting alertness, concentration and mindfulness activities.

Cordyceps militaris

This mushroom contains adenosine, vitamins and amino acids. It improves blood circulation, protects the kidneys and regulates cortisol. It is used globally to increase athletic, physical and sexual performance, reduce fatigue and improve mood.

Trufa

This mushroom contains antioxidants that constitute a defense against generalized aging of the organism and help fight free radicals. It also has elastic properties that positively stimulate collagen production.

A photograph of four young adults (three women and one man) sitting together and laughing heartily. They are in a rustic, wooden interior, possibly a cafe or a cabin. The woman on the far left is wearing a white sweater and sunglasses. The woman next to her is wearing a brown jacket and sunglasses, holding a white cup. The woman in the center is wearing a black hat, glasses, and a black top, holding a glass of amber liquid. The man on the far right is wearing a black cap, sunglasses, and a black jacket, holding a white cup. The background shows wooden walls and some greenery.

*It has never been so
much fun to **be healthy***

"All our coffees do not cause heartburn, palpitations or anxiety. They contain non-dairy creamer, ideal for lactose intolerant people. All our products come in sachets for personal consumption, practical to carry everywhere and guarantee the conservation of nutrients.
